PROJECTS

1) Sorting Visualizer | HTML,CSS,JavaScript,React.js,Tailwind CSS **|** Date:2025

- Created a web-based Sorting Visualizer to demonstrate how different sorting algorithms work using real-time animations. The project aims to make algorithm learning easier for students. I handled the complete frontend development using React.js, and Tailwind CSS.
- Made the project more user-friendly by adding features like speed control and colorful animations, which helped users understand sorting steps more clearly.
